15. Troubleshooting

1. Welcome to DeltaQuant POS

DeltaQuant POS is offline point-of-sale software built for small and medium-sized retail businesses. It helps you manage sales, inventory, products, and staff — including receipt printing, stock tracking, and sales reporting — all from one system that works without a constant internet connection.

There are two ways to experience DeltaQuant POS:

- Try the Free Demo — explore the full interface online, no installation required, limited to 10 transactions per day.
- Purchase the Full Version — a one-time payment gets you the desktop app, unlimited transactions, and full offline access, forever. No subscriptions, no recurring fees.

2. Trying the Free Demo

The free demo lets you explore DeltaQuant POS directly in your web browser before you buy, using the same interface as the desktop app.

Step 1	Visit the DeltaQuant POS demo website
Step 2	Log in with the demo credentials shown on the login screen
Step 3	Explore the Dashboard, Products, Inventory, Sales, Reports, and Users pages
Step 4	Process demo transactions to test the checkout and receipt flow

 **Note:** The demo requires an internet connection and shares data with other demo visitors. The desktop app is fully private, works offline, and has no transaction limit.

2.1 Demo Transaction Limit

A banner at the top of every page shows how many demo transactions have been used today, for example "7 / 10 used". Once the limit of 10 is reached, attempting to check out shows a "Daily Limit Reached" screen instead of completing the sale.

The limit resets automatically at midnight. You can click "Get Full Version" at any time — in the banner or in the limit screen — to move straight to purchasing the desktop app.

3. Purchasing the Full Version

When you are ready to move beyond the demo, purchasing DeltaQuant POS is a single one-time payment — there is nothing to renew.

Step 1	Click "Get Full Version" from the demo banner, or go directly to the purchase page
Step 2	Enter your email address
Step 3	Click "Buy Now"
Step 4	You will be redirected to Paystack's secure checkout page
Step 5	Complete payment using your card, bank transfer, or USSD
Step 6	You will be redirected back automatically once payment is confirmed

 **Note:** Payments are processed securely by Paystack. DeltaQuant Solutions never sees or stores your card details.

4. Downloading & Installing

Step 1	After payment, wait a few seconds while your payment is confirmed
Step 2	Once confirmed, click "Download DeltaQuant POS"
Step 3	The installer file (DeltaQuant_POS_setup.exe) downloads to your Downloads folder
Step 4	Locate the file and double-click it to start the installer
Step 5	Follow the installation wizard — click Next, then Install, then Finish
Step 6	A shortcut is created on your Desktop and/or Start Menu

 **Note:** Your download link is valid for 48 hours. If it expires or you lose it, check your email for a copy, or return to the purchase page and contact support with your payment reference.

 **Note:** Windows may show a security warning ("Windows protected your PC") because the installer is new and not yet widely recognised. Click "More info" then "Run anyway" to continue — this is expected and safe.

4.1 First Launch After Installing

The very first time you open DeltaQuant POS after installing, it automatically sets up your local database. Log in using the default administrator account below, then create your own users right away.

Field	Default Value
Username	admin
Password	admin123

 **Note:** For security, change this password immediately after your first login. Go to Users, edit the admin account, and set a new password.

5. Getting Started

5.1 Launching the App

Double-click the DeltaQuant POS icon on your desktop or find it in the Start Menu. The app takes 30–60 seconds to start on first launch as it initialises the backend server.

 **Note:** Do not close the app while it is loading. Wait until the login screen appears.

5.2 System Requirements

Requirement	Minimum
Operating System	Windows 10 or later (64-bit)
RAM	4GB minimum, 8GB recommended
Storage	1GB free disk space
Display	1280 x 800 resolution or higher
Internet	Not required (fully offline)

6. Logging In

When the app opens, you will see the Login screen. Enter your username and password provided by your administrator.

Step 1	Launch the DeltaQuant POS app from your desktop
Step 2	Wait for the login screen to appear (30–60 seconds)
Step 3	Enter your Username in the first field
Step 4	Enter your Password in the second field
Step 5	Click the Login button

6.1 User Roles

The system has three roles with different access levels:

Role	Badge Color	Access
Admin	Purple	Full access — all features including Users and Backup
Manager	Blue	Products, Inventory, Sales, Reports
Cashier	Green	Sales only

 **Note:** Change your default password after first login by asking your admin to update it in User Management.

7. Dashboard

The Dashboard is the first screen you see after logging in. It shows a summary of your store's performance at a glance.

7.1 Summary Cards

Card	What it shows
Today's Sales	Number of transactions completed today
Today's Revenue	Total money collected today in Naira
Monthly Revenue	Total revenue for the current month
Total Sales	All-time number of transactions ever recorded

7.2 Top Products Table

Below the summary cards is a table showing your best-selling products ranked by units sold and revenue generated. This updates automatically as sales are recorded.

7.3 Backup Database Button (Admin Only)

Admins will see a yellow 'Backup Database' button at the top right of the dashboard. Click it to download a copy of your database to your Downloads folder. Always backup before reinstalling the app.

8. Products

The Products page allows administrators and managers to manage all products available for sale.

8.1 Adding a New Product

Step 1	Click 'Products' in the left sidebar
Step 2	Click the '+ Add Product' button at the top right
Step 3	Fill in the product details: Name, Price, Barcode (optional), Category
Step 4	Click 'Save Product'
Step 5	The product will immediately appear in the product list and on the Sales page

8.2 Editing a Product

Step 1	Find the product in the product list
Step 2	Click the 'Edit' button next to the product
Step 3	Update the details as needed
Step 4	Click 'Update Product' to save changes

8.3 Deleting a Product

Step 1	Find the product in the product list
Step 2	Click the 'Delete' button next to the product
Step 3	Confirm the deletion when prompted

 **Note:** Deleting a product does not delete past sales records. Historical data is preserved.

8.4 Searching for a Product

Use the search bar at the top of the Products page to find a product by name. Results update as you type.

9. Inventory

The Inventory page shows stock levels for all products and allows you to adjust quantities.

9.1 Viewing Stock Levels

The inventory table shows each product with its current stock quantity. Products with low stock are highlighted so you can restock quickly.

9.2 Adjusting Stock

Step 1	Go to the Inventory page from the sidebar
Step 2	Find the product you want to adjust
Step 3	Click 'Adjust Stock'

Step 4	Enter the quantity to add (positive number) or remove (negative number)
Step 5	Add a reason for the adjustment
Step 6	Click 'Save'

 **Note:** Stock is automatically reduced when a sale is completed. Manual adjustments are for restocking, damages, or corrections.

10. Sales & Checkout

The Sales page is where cashiers process customer transactions. It is designed for fast and easy checkout.

10.1 Processing a Sale

Step 1	Click 'Sales' in the left sidebar
Step 2	Find the product by scanning its barcode OR clicking it in the product grid
Step 3	The product is added to the Cart on the right side
Step 4	Adjust quantities using the + and – buttons in the cart
Step 5	Apply a discount if applicable (enter amount in the Discount field)
Step 6	Select the Payment Method: Cash, Card, or Transfer
Step 7	Click 'Checkout' to complete the sale

10.2 Using the Barcode Scanner

The barcode input field is automatically focused when the Sales page opens. Simply scan a product barcode and press Enter — the product is added to the cart instantly. You can also type the barcode manually and press Enter.

 **Note:** If a barcode is not found, check that the product has been added with the correct barcode in the Products page.

10.3 After Checkout

After a successful checkout, a green banner appears showing the Sale number and total amount. You will see a 'View Receipt' button — click it to open the receipt for printing.

 **Note:** Out-of-stock products are greyed out and cannot be added to the cart.

11. Receipts & Printing

After every sale, a receipt is automatically generated. You can view and print it immediately.

11.1 Viewing a Receipt

Step 1	Complete a sale on the Sales page
Step 2	Click the 'View Receipt' button in the green success banner
Step 3	The receipt opens showing all sale details

11.2 What the Receipt Shows

- Shop name, address, and phone number
- Receipt number and sale number
- Date and time of the transaction
- Name of the cashier who processed the sale
- List of items sold with quantity and unit price
- Total amount and payment method

11.3 Printing a Receipt

Step 1	Open the receipt page
Step 2	Click the 'Print Receipt' button at the top right
Step 3	Your system's print dialog will open
Step 4	Select your printer and click Print

 **Note:** The navigation bar and buttons are automatically hidden during printing so only the receipt content is printed.

11.4 Going Back to Sales

Click the 'Back to Sales' button on the receipt page to return to the Sales page and process the next customer.

12. Reports

The Reports page provides detailed analytics about your store's performance. It is available to Admins and Managers.

12.1 Summary Cards

At the top of the Reports page are four summary cards showing Today's Sales, Today's Revenue, Monthly Revenue, and All-Time Sales — the same as the Dashboard.

12.2 Top Products Tab

Shows the top best-selling products ranked by units sold, along with the total revenue each product has generated. Use this to identify your most popular items.

To export this data to Excel:

Step 1	Click the 'Top Products' tab
Step 2	Click the green 'Export CSV' button
Step 3	A CSV file downloads to your Downloads folder
Step 4	Open it in Microsoft Excel or Google Sheets

12.3 Sales History Tab

Shows every transaction ever recorded with the date, amount, discount applied, payment method, and the cashier who processed it.

To export sales history to Excel:

Step 1	Click the 'Sales History' tab
Step 2	Click the green 'Export CSV' button
Step 3	A CSV file downloads to your Downloads folder
Step 4	Open it in Microsoft Excel or Google Sheets

13. User Management

User Management is only available to Administrators. It allows you to add, edit, and remove users from the system.

13.1 Creating a New User

Step 1	Click 'Users' in the left sidebar
Step 2	Click the '+ Add User' button
Step 3	Enter the Username (must be unique)
Step 4	Enter a Password for the user
Step 5	Select a Role: Admin, Cashier, or Manager
Step 6	Click 'Save User'

13.2 Editing a User

Step 1	Find the user in the users table
Step 2	Click the 'Edit' button next to their name
Step 3	Update the username, password, or role
Step 4	Click 'Update User' to save changes

|  **Note:** Leave the password field blank when editing to keep the user's existing password.

13.3 Deleting a User

Step 1	Find the user in the users table
Step 2	Click the 'Delete' button next to their name
Step 3	Confirm the deletion

|  **Note:** You cannot delete your own admin account. This prevents accidental logout.

13.4 Default Roles

Role ID	Role Name
1	Admin
2	Cashier

3	Manager
---	---------

14. Database Backup

All your data — products, sales, users, inventory — is stored in a database file on this computer. It is important to back it up regularly.

14.1 How to Backup

Step 1	Log in as Admin
Step 2	Go to the Dashboard
Step 3	Click the yellow 'Backup Database' button at the top right
Step 4	A file named briskpos-backup-[date].db downloads to your Downloads folder
Step 5	Copy this file to a USB drive or cloud storage (Google Drive, OneDrive)

14.2 When to Backup

- Every day at the end of business
- Before reinstalling or updating the app
- Before moving the app to a new computer
- After any major data entry (many products added)

14.3 Restoring a Backup

If you need to restore your data from a backup file, contact your system administrator or DeltaQuant Solutions for assistance.

 **Note:** The database file is located at: C:\Users\[YourName]\AppData\Roaming\POS Desktop\pos.db

15. Troubleshooting

Problem	Solution
App takes too long to load	Wait up to 2 minutes on first launch. The backend server needs time to start.
Login fails with correct credentials	Close and reopen the app. Wait for full load before trying again.
Products not showing on Sales page	Check that products have been added on the Products page.
Barcode not found	Verify the barcode was entered correctly when adding the product.
Cannot print receipt	Make sure a printer is connected and set as the default printer in Windows settings.
Sale fails — stock error	The product is out of stock. Adjust inventory before selling.
White blank screen	The frontend is still loading. Wait 30 seconds and do not close the app.
Cannot create user	Username already exists. Try a different username.
Backup button not visible	Only Admins can see the backup button. Log in as Admin.

Payment successful but download not showing	Wait a few seconds for confirmation and the page to refresh. If it persists, check your email or contact support with your payment reference.
Download link expired	Return to the purchase page or contact DeltaQuant Solutions for a new link.
Windows blocked the installer	Click "More info" then "Run anyway". This is expected for new software until it builds reputation with Windows.
"Daily Limit Reached" on the demo	This only happens on the free web demo, not the desktop app. Click "Get Full Version" to purchase unlimited access, or wait until midnight for the demo limit to reset.

For technical support, contact DeltaQuant Solutions
